

High-Intensity-Discharge (HID) Light Bar

Agricultural and Mining Products

Light up your fields with 24" forward mounted lightbar

Lighting solutions for mining operations.

When you need to work late to get the job done, rely on the Ibis Tek lightbar to provide excellent visibility around your equipment. The improved forward and side visibility will allow you to operate in greater confidence and added safety.

Based on High Intensity Discharge (HID) lighting technology, our solution doubles forward visibility as compared to traditional halogen lighting solutions.

A reputation built on responding quickly to customer needs with quality products is something we are proud of and will continue to focus on throughout our operations.

Veteran-Owned Small Business

HID BENEFITS

Description	Length	HID Bulbs	Weight	Voltage	Current Draw
24" Light Bar	24in	2 HID	9lbs	12 VDC	5 A

About Us

Ibis Tek, LLC is a veteran-owned small business that designs and manufactures a range of products for military and commercial applications. Quick response and continuous product development and improvement have been the cornerstone of our success.

We design, manufacture and test specialized products for military and security customers through our Military Products, Commercial Products and Robotics Solutions teams.

- **Improved light output** compared to halogen and incandescent light sources
- **Longer service life** lasting 8-10 times longer than halogen bulbs
- **Brighter, whiter light** that is easier on the eye

Lighting is critical for safety of operations
