**Ibis Tek**
Commercial Products Group

Ibis Tek was formed as a veteran-owned LLC in 1999 and manufactures and markets a range of military and security products. These products include ballistic glass assemblies and accessories for military and personal security vehicles, such as an innovative HMMWV Spare Tire Carrier, HMMWV Tow Bar and Transparent Armor Systems. Our security flagship products are the COBRA S5 and JACKAL specialty “stealth” vehicles with remote-controlled weapons stations. These personal security vehicles help meet the security needs of VIPs and heads of state all over the world. We hold several issued and pending patents for various components of personal protection vehicles and after-market accessories, and are proud of our participation in classified programs that will result in greater protection for our combat personnel.

Ibis Tek has applied extensive knowledge and expertise to the area of law enforcement with a new line of products that are designed to protect those who serve.

Our mission at Ibis Tek is to keep the FOCUS — Facilitating Our Customer's Ultimate Security.

The Ibis Tek **Lightweight Front Protective Bumper** is the newest and safest push bumper on the market today. It attaches to the vehicle frame without modifications, without affecting vehicle handling and tire wear, and without lowering gas mileage.

Lightweight Front Protective Bumpers

- Lightweight – made of 6061 T6 aluminum
- Custom-fit kits specifically for your make of vehicle
- Mounts to existing vehicle frame – does not alter air bag deployment
- Ease of installation – detailed, step-by-step instructions included
- Powder coat – any color, no charge
- Three-year warranty

Additionally

- Allows a PIT (precision immobilization technique) maneuver to be performed without damage to your vehicle.
- Protects engine and cooling components from being damaged by objects in its path.

- Allows disabled vehicles to be easily pushed to safety
- Reduces damage from animal strikes
- Can lower your insurance costs

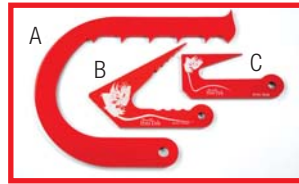

Vehicle	Weight	Part Number

Ford Excursion	94 lbs.	2809-100-001

With Ibis Tek's versatile **Rat Claw Emergency Rescue Device**, vehicles can be uprighted in a matter of minutes and moved or towed quickly and safely. No patrol vehicle should be without it.

Rat Claw Emergency Rescue Device

Vehicle doors and sealed compartments are easily pulled open with the Rat Claw by putting the hook over the door and pulling with a secondary vehicle. A safety strap attached to the Rat Claw prohibits the system from inadvertently causing collateral damage. Metal doors and barred windows can be easily pulled from existing structures when entry is required. And a vehicle can be uprighted in a matter of minutes or towed quickly and safely.

- Rescue trapped motorists
- Open sealed security doors quickly
- Emergency tow distressed vehicles
- Remove virtually any sealed structure or device

Optional Vehicle Door Hook (A) and Building Door Hook (B) shown compared to Standard Rat Claw Hook (C)

*The **Rat Claw Emergency Rescue Device** includes: 8' Cable, 16' Cable, 2 Rat Claw Hooks, 3 Clevises, Safety Strap and Carry Bag.*
