

Lightweight Front Protective Bumpers

Ibis Tek
Commercial Products Group

The Ibis Tek **Lightweight Front Protective Bumper** is the newest and safest push bumper on the market today. It attaches to the vehicle frame without modifications, without affecting vehicle handling and tire wear, and without lowering gas mileage.

Lightweight Front Protective Bumpers

The Benefits of an LFPB

Studies have shown that promptly removing non-functional vehicles from the traffic pattern can greatly reduce the chance of additional accidents from occurring. The LFPB enables disabled automobiles to be easily and safely pushed out of oncoming traffic.

- **Lightweight** – made of 6061 T6 aluminum
- **Custom-fit** kits specifically for your make of vehicle
- **Mounts to existing vehicle frame** – does not alter air bag deployment
- **Ease of installation** – detailed, step-by-step instructions

- **Powder coat** – any color, no charge
- **Three-year warranty**

Additionally

- Allows a PIT (precision immobilization technique) maneuver to be performed without damage to your vehicle.
- Protects engine and cooling components from being damaged by objects in its path.
- Allows disabled vehicles to be easily pushed to safety
- Reduces damage from animal strikes
- Can lower your insurance costs
