

EMERGENCY EGRESS WINDOWS

Simple Safety Enhancement

The Ibis Tek Emergency Egress Window (EEW) kit is a low-cost safety enhancement for any up-armored tactical or combat vehicle. The system enables crew quick, easy evacuation in an event where traditional egress points are unavailable. Ibis Tek EEWs have been tested and approved by the US Military for multiple vehicle programs.

Systems extensively tested and approved by US Military

Enables crew evacuation in less than 1 minute post-event

Simple operation tested to meet Human Factor requirements

Over 40,000 Emergency Egress Windows fielded on HMMWV, MaxxPro, RG33 and Caiman

EMERGENCY EGRESS WINDOWS

SPECIFICATIONS

Tested and Approved:

Ballistic Shock

Crash Shock

Drop Test

Frontal Crash

Gasket/Seal Release

Handle Rotation Force

Material Compatibility

Separation Force

Temperature Extremes

Thermal Shock

Vehicle Rollover

Vibration

Washdown/Leak/Rain

ADAPTABLE DESIGNS

The successful and continued fielding since 2007 of HMMWV Emergency Egress Windshields led to the recent adoption of similar emergency egress requirements on other vehicle programs. The systems are custom designed to meet threat and configuration requirements but retain design elements proven in the success of the program. The kits can be field installed or integrated into vehicle prototype and production builds.

- Simple installation can be designed to require no special tools
- Installation in less than 4 hrs in field by unit maintenance personnel
- No hull modification designs enable future use of egress kit or standard window

SIMPLE 4 STEP OPERATION

1 Pull Pin

2 Rotate Handles

3 Push Out Window

4 Egress Through Opening
