

FRONT PROTECTIVE BUMPER

ENHANCE VEHICLE PROTECTION

Ibis Tek's HMMWV Front Protective Bumper (FPB) is proven to enhance vehicle protection. The durable design easily pushes obstacles from roadways and protects critical engine components in collision incidents. The bumper is easy to install and will not interfere with hood or winch operation.

Reliable, robust design enhances protection of vehicle components

Easily installs in less than 1 hour with no special tools mounting directly to existing bolt pattern

Installation will not interfere with hood or winch operation

Optional accessories including Night Vision Headlights, Wire Cutter and Adaptor and Cornering Lamps

FRONT PROTECTIVE BUMPER

SPECIFICATIONS

Lightweight aluminum construction
with steel reinforcements

Flat black and desert tan powder coating

The Night Vision Headlights (NVH) illuminate the area in front of vehicle enabling normal operation during lights out driving.

The Cornering Lamps enhance visibility of roadside debris and IEDs. The kit includes wire screen for protection from rock/gravel.
